

Lab 5: Prototyping with

Prototyping with Marvel Tutorial

Now that you know how to use Marvel...

8-6-4-2 rapid prototyping challenge

The aim of this technique is that you create a “quick & dirty” app prototype inspired by a combination of 3 words (from the next slide).

1. The first version of your project has to be created in **~8 minutes!**
2. Then, you have 5 minutes to share your prototype with someone in the room. That person has to post a comment on your design (using Marvel comments or directly to you!)
 1. Name your project after the main functionality of your app so that the person commenting can quickly know what the app is about!
 2. Comments can be related to the functionality or the aesthetics
3. Afterwards, you have **~6 minutes** to address the comment, then you have 5 minutes to share the prototype with another person (different from the previous one)
4. This process gets repeated for a **~4 minute** slot and in the end, you have **~2 minutes** to complete your design
 1. You don't get feedback on the last period
5. Once you have your ultimate design, post the Marvel link in the discussion forum.
 1. Reply to the Topic 5 post with the link and the 3 words you used as inspiration

The list of words (choose one per column)

- | | | |
|---------------------|--------------------|------------------|
| • Pizza | • NFC | • Schedule |
| • Grocery | • Taxi | • Geolocation |
| • Tracking | • Coffee | • Recipes |
| • Language | • Health | • Barcode |
| • Home | • Events | • Petrol Station |
| • Emotion | • Fitness | • Memorise |
| • Voice Recognition | • Transport | • Networking |
| • Historical Site | • VR/AR | • Motion Sensor |
| • Wireless | • Face Recognition | |
