

Lab 3: Inverse HTA diagrams

- Today you'll be creating an “inverse” HTA diagram:
 - i.e. I give you the structure, and you populate with a realistic task!
 - <https://app.creately.com/diagram/rudUt3AEdN3>
- I have put the template in [Creately](#), you can either create an account and use the template, or re-draw it with any other tool you like:
 - You can see the template on the next slide.
- I will split you in teams of up to 10 people (breakout rooms).
- Make your best effort to follow the template, although if this is not possible you are allowed to do up to three changes!
- After ~40 min, I will call everyone back to the main room and a member of the team will present the final result.
- We will have a competition for the best “inverse” diagram; members of the winning team will get a “treasure mark”.

Everyone wins!

Note: Anything that you need to clarify goes here!
